BRING US YOUR WOMEN

PRESENTED BY CATHERINE CAPOZZI & AXEMUNKEE

Life is an unfoldment, and the further we travel the more truth we can comprehend. To understand the things that are at our door is the best preparation for understanding those that lie beyond.

-Hypatia of Alexandria (350-415 CE)

An international cast of musicians, filmmakers, visual artists, dancers, and poets have come together to present Bring Us Your Women, which looks to share untold, recontextualized, or reimagined stories of iconic women who have often been overlooked or defined only by their role in the context of men. By giving these women a voice, the project hopes to shed light on their importance in history, religion, and myth, and to empower women to recognize their essential role in shaping our modern world.
